Implementation Guide reports provide users with the know-how to keep a project running and on budget.

- Building and Retaining the US e-Government Workforce
- Conducting an Information Security Gap Analysis
- Deploying Enterprise IM
- Deploying a Wireless LAN
- Designing XML-based Web Sites
- Developing On-Line Instruction Courses with e-Learning Tools
- Ensuring Privacy and Security for Medical Information Systems
- Implementing Health Insurance and Portability Act (HIPAA) Compliance
- Implementing IPv6
- Implementing IT Outsourcing
- Implementing a Customer Relationship Management System
- Implementing a Public Sector eProcurement Program in the US
- Implementing a Service Oriented Architecture
- Implementing a Telecommuting Program
- Implementing an Enterprise Content Management System
- Measuring and Reducing Total Cost of Ownership
- Outsourcing Business Continuity Planning
- Preparing a Business Continuity Plan
- Setting Up a Call Center
- Setting Up a Help Desk

Standards reports examine the major IT and communications standards and protocols currently in place.

- 10G Ethernet Standard
- 2.5G Wireless Standards
- 802.11 Standards
- Asynchronous Transfer Mode (ATM) Standards
- Binary Runtime Environment for Wireless (BREW)
- Cordra Web-based Learning Model
- General Packet Radio Service (GPRS) Overview
- Gigabit Ethernet Protocol
- ISO 14000 Environmental Management Standard
- ISO-9000 Quality Assurance Standards
- Imaging Standards
- Internet Standards and Controlling Bodies
- OGSA Standard
- Open Document Format Standard
- Optical Network Standards
- PCI Data Security Standard
- Port Security Standards Worldwide
- Public Key Standards
- Shareable Content Object Reference Model (SCORM)
- Simple Network Management Protocol (SNMP) Standard
- Simple Object Access Protocol (SOAP) for Web Applications
- Synchronized Multimedia Integration Language (SMIL)
- US Federal Smart Card Standards
- Universal Description Discovery and Integration (UDDI) Standard
- Universal Mobile Telecommunications System (UMTS)
- WS-Security Standard
- Wi-Fi Protected Access Security Standards
- Wireless Application Protocol (WAP)
- Worldwide Biometric Standards
- XML Web Standards

Comparison and Selection Guide reports offer the intelligence users need to make the BEST product and service selections.

The Guide to Internet Research

The Guide to Internet Research (formerly The CyberSkeptic's Guide to Internet Research) explores and evaluates free Web sites and search strategies to help subscribers use the Internet to stay up-to-date on resources. Going into its eighth year of publication, The Guide to Internet Research provides concise, practical information and expresses strong opinions on the quality of Internet information sources, according to the announcement. The newsletter is geared toward business, news, technical, medical, legal, and international research as well as market research and competitive intelligence.

The Information Advisor Newsletter and Knowledge Management Quarterly Supplement

The Information Advisor Newsletter and Knowledge Management Quarterly Supplement specializes in reviews and side-by-side comparisons of business information services and resources.
